The Permanent Service for Mean Sea Level (PSMSL)

web: http://www.pol.ac.uk/psmsl

Director: Lesley J. Rickards (UK)

Development

Since 1933, the Permanent Service for Mean Sea Level (PSMSL) has been responsible for the collection, publication, analysis and interpretation of sea level data from the global network of tide gauges. It is based in Liverpool at the Proudman Oceanographic Laboratory (POL) which is a component of the UK Natural Environment Research Council (NERC). The PSMSL is a member of the Federation of Astronomical and Geophysical Data Analysis Services (FAGS) established by the International Council for Science (ICSU). It is supported by FAGS, the Intergovernmental Oceanographic Commission (IOC) and NERC.

Mission/Objectives

The mission of the PSMSL is to provide the community with a full Service for the acquisition, analysis and interpretation of sea level data. Aside from its central role of operation of the global sea level data bank, the PSMSL provides advice to tide gauge operators and analysts. It occupies a central management role in the development of the Global Sea Level Observing System (GLOSS) and hosts important international study groups and meetings on relevant themes. Several such meetings are planned for 2008 to mark the 75th Anniversary of the PSMSL.

Products

The database of the PSMSL contains over 55000 station-years of monthly and annual values of mean sea level (MSL) from almost 2000 tide gauge stations around the world received from almost 200 national authorities. On average, approximately 2000 station-years of data are entered into the database each year. This database is used extensively throughout the sciences of climate change, oceanography, geodesy and geology, and is the main source of information for international study groups such as the Intergovernmental Panel on Climate Change (IPCC).

Data for all stations are included in the PSMSL METRIC (or total) data set. The METRIC monthly and annual means for any one station-year are necessarily required to be measured to a common datum, although, at this stage, datum continuity between years is not essential. The year-to-year datum checks become essential, however, if the data are subsequently to be included in the PSMSL 'Revised Local Reference (RLR)' component of the data set.

The 'Revised Local Reference (RLR)' dataset of the PSMSL contains records for which time series analysis of sea level changes can be performed. Long records from this dataset have been the basis of all analyses of secular changes in global sea level during the last century. The geographical distribution of longer RLR records contains significant geographical bias towards the northern hemisphere, a situation which is being rectified by the establishment of the GLOSS global sea level network.

The PSMSL is also responsible for the Higher Frequency Delayed Mode (HF DM) data set of sea level information from the GLOSS Core Network. This consists of the original sea level measurements from each sites (typically hourly values) which provide a strategic backup to the MSL information of the main PSMSL data set.

In addition, the PSMSL provides a range of sea level products (e.g. anomaly maps, tables of sea level trends) for its users. These findings are input to national and international scientific study groups regularly. A range of training materials and software products are also made available via its web site which can be consulted for more information.
Structure/Governing Board Members

The PSMSL reports formally to the IAPSO Commission on Mean Sea Level and Tides (President Prof. P. L. Woodworth, UK). It is also served by an Advisory Group which at present consists of Dr. R. Neilan (JPL, USA), Prof. G. Mitchum (University of South Florida, USA), Prof. B. Douglas (University of Maryland, USA), Prof. D. Pugh (Liverpool University, UK), Dr. P. Knudsen (Danish National Space Center), Dr. J. Church (CSIRO, Australia), Dr. R. Bingley (Nottingham University, UK), Dr. T. Aarup (IOC, UNESCO) and Dr. J. Fierro (SHOA, Chile). Suggestions for improvements in PSMSL activities may be sent directly to the PSMSL or via the IAPSO Commission or via any member of the Advisory Group.

Points of Contact

Permanent Service for Mean Sea Level
Proudman Oceanographic Laboratory
Joseph Proudman Building
6 Brownlow Street
Liverpool L3 5DA, UK.

Fax: +44 (0)151-795-4801

Staff members

• Dr. L. J. Rickards (Director)
• Prof. P. L. Woodworth
• Dr. S. Jevrejeva
• Dr. S. Holgate
• Mrs. K. Gordon (Data Base Manager)
• Miss E. Bradshaw (for GLOSS DM HF data set)
